PROGRAMMING SKILLS

- **Programming languages:** Java, JavaScript, TypeScript, Swift, Python, Go
- **Technologies:** React, React Native, Flutter, PostgreSQL, Firebase, GraphQL, Node.js., Selenium, Angular

EXPERIENCE

- **Fidelity Investments** Durham, NC
Associate Software Engineer(Web/iOS) *Jan 2021 - Present*
 - Web: Created Jenkins pipeline to use smart Nx CLI to decreased build and deploy time by 60%
 - Web: Integrated Storybook.js to Angular Nx monorepo and increase component reusability by 48%
 - iOS: Supported iOS squad on implementing omnichannel experience accross Mobile and Web
 - iOS: Integrated Google API for address autocomplete on Fidelity Spire
- **Acme Pro Academy** New York, NY
Lead Technical Instructor(QA) *Sep 2020 - Present*
 - Led classroom of 15+ students for 2 batches covering topics like Java, SQL, Selenium WD, Jenkins, and more
 - Provided students with well documented assignments and review resources
 - Delivered constructive feedback on assignment and general performance
 - Conducted several group and 1:1 mock interviews to test students' critical thinking
- **Errunds** New York, NY
Software Engineer Intern(Fullstack Web) *Jun 2020 - Sep 2020*
 - Developed admin site to view vendor and client statistics
 - Integrated MaterialUI and React components to generate dashboards
 - Performed GraphQL queries using Apollo to fetch data from Node.js, GraphQL backend service
 - Implemented Admin authentication flow using Passport Node.js middleware
- **Keko Box** New York, NY
Software Engineer Intern(Fullstack Web) *Mar 2020 - Jun 2020*
 - Implemented backend endpoints Go to allow vendor to access recently fulfilled/unfulfilled orders
 - Built frontend components using React for above feature which resulted in seed funding of \$30,000
 - Integrated Logout functionality using Auth0 authentication/authORIZATION service
 - Performed Database migration to store vendors' par levels in PostgreSQL

PROJECTS

- **FitPal**
Web Application
 - A Web Application built for workout lovers. It allows users to register and record their workout sessions in the form of a calendar. It utilizes the YouTube API to allow users to search for a workout to see how it is done
 - Built using React, Material UI to achieve a clean UI and easy architecture and Firebase tools to store entries to DB, implement authentication, and host on web
 - Developed the authentication using Firebase Auth, enforced only workout searched on YouTube API, implemented a functionality to allow users to edit workout sessions
- **Tracked**
Mobile App(Android/iOS)
 - Mobile application (Android/iOS) for New York Department of Education that tracks the location and status of 200+ technology devices at public schools
 - Built using Flutter SDK and Firebase to achieve cross platform compatibility as well as fast user authentication and data retrieval
 - Developed and designed functionality for user to add, delete, update, and view assets based on their school

EDUCATION

- **City University of New York - Brooklyn College** Brooklyn, NY
Bachelor of Science in Computer Science *Fall 2020*
